Re: Consultation for Mr. Barry Thomas Hall (telephone 514-907-1151)

To Whom It May Concern:

I would like to refer you one of my patients who has moved from Montreal to Nova Scotia and requires regular cardiology surveillance.

Mr. Hall is a 64-year-old gentleman who had a myocardial infarction in 2016 and underwent PCI X 2 (LAD & Cx) at that time. Since 2021, he has had paroxysmal atrial fibrillation which was well controlled with sotalol.

However recently his AFib seems less well controlled and he requires cardiology follow-up to optimize his treatment for this condition and to avoid the adage of "atrial fibrillation begetting atrial fibrillation."

I would be most appreciative if he could be seen in a timely manner by a cardiologist.

Thank you for your assistance in caring for this very nice gentleman.

Best regards

*James Brophy*
